Incident Management 101

DG Interns Hub - Week 3 | **Name: Harini E | Intern ID: DG/15/OCT/CYBER/040**

Platform	LetsDefend (free course)
Course	Incident Management 101 (badge name: Incident Management)
Completed on	06 November 2026, 10:17 AM
Status	Completed, quiz taken and badge earned

Overview

This course explains how a SOC handles incidents in an organised way, from naming and tracking a case to following a playbook and knowing what an analyst does when an alert appears. It builds on the SIEM alert course I finished earlier, which also covered case creation and playbooks, and it gave me the process side of the work behind the tools I used this week.

Lessons in the course

Lesson	In short
Introduction to Incident Management	What incident management is and why a SOC needs it.
Basic Definitions About Incident Management	The key terms used when talking about incidents.
Incident Management Systems (IMS)	The systems used to record, track and manage incidents.
Case/Alert Naming	Naming cases and alerts clearly so they are easy to find and follow.
Playbooks	Step-by-step guides for handling a type of incident.
What Does the SOC Analyst Do When An Alert Occurs?	The steps an analyst follows from the moment an alert appears.
Incident Management 101 (Quiz)	A quiz to check what I learned from the course.

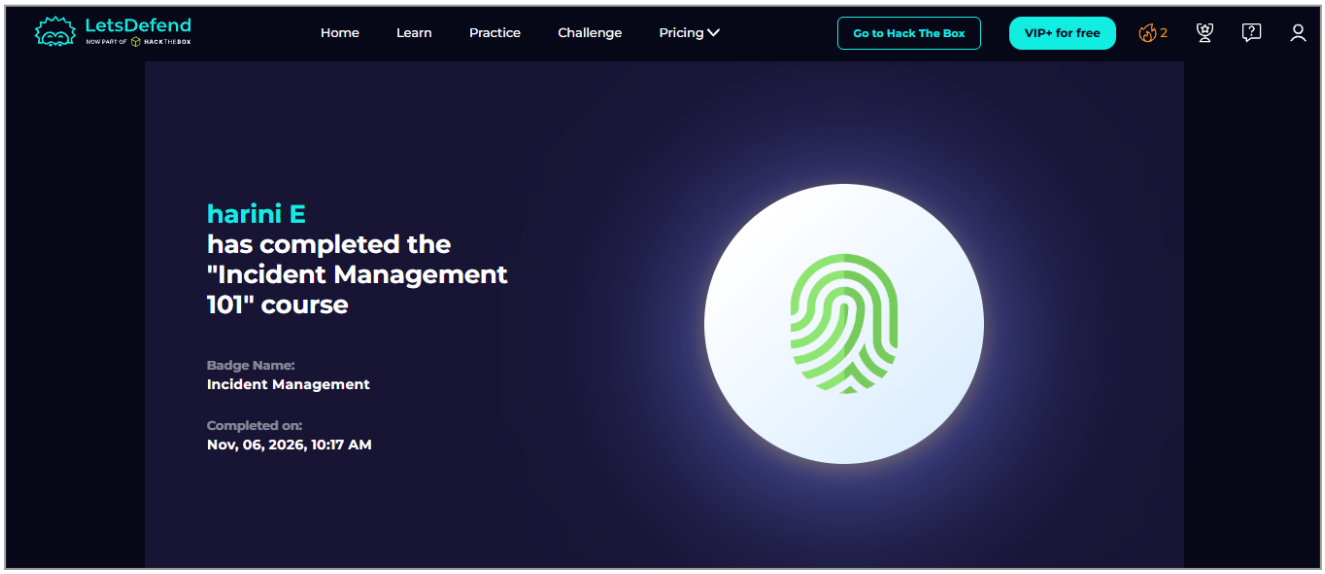

Questions and quiz

In the last lesson the question box showed "No Answer Needed" and was marked Completed, so there was nothing to type there. The course ends with the Incident Management 101 quiz, and the View Quiz Result button in my screenshot shows that I took it. The progress bar for the questions shows 100%.

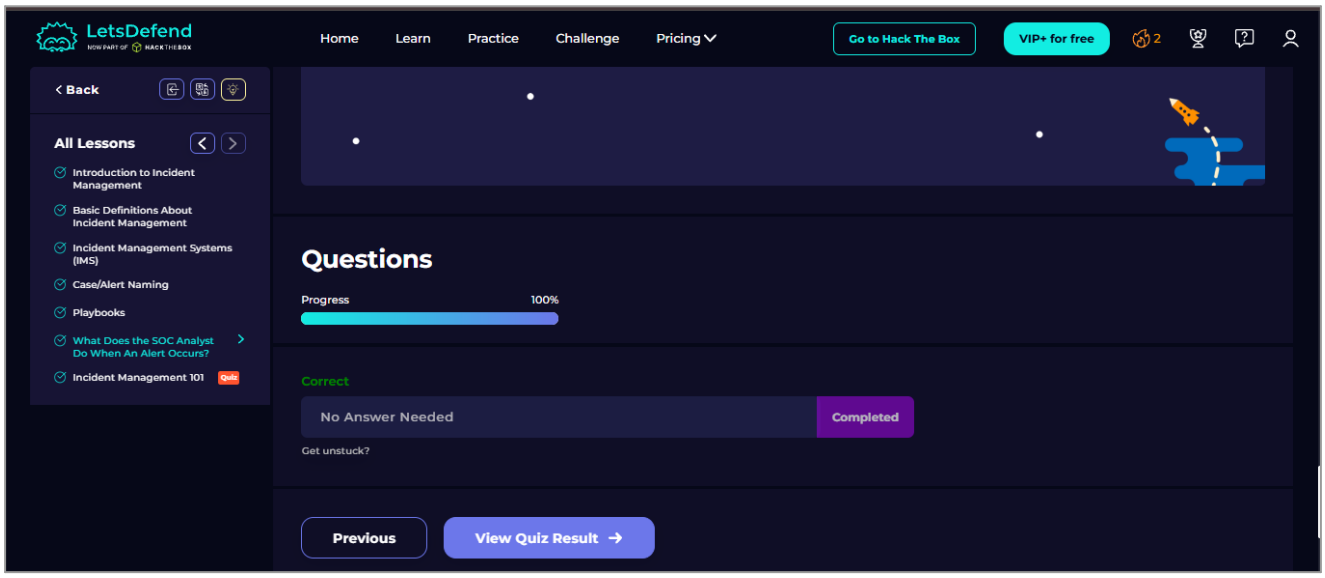

What I took from it

Incident management is as much about process as about tools. Clear case names, a system to track cases and playbooks to follow mean that different analysts can handle the same kind of alert in the same way. It also showed me where my lab work fits: the Sysmon, auditd and Snort data I collected would be the evidence attached to a case in a real SOC.

Evidence

1. Badge page showing the Incident Management 101 course completed on 06 November 2026, 10:17 AM

2. Lesson list with all lessons checked, the questions at 100% and the quiz result button
